try that and see Avenue different implementation the domain detection detection the hope it works. Wave and then push it just so that I don't want it to get Rewritten we can run the analyses working just for you Rosa from me I'm currently recording my audio I'm also pushing up because when we get the code for the highlighting of the words this hope it works. PDF since it has a lot of likes and be a really good example we could potentially even show it or something and it's these examples that are already there and the other thing is that if we this is a lot more organic this is speaking this is us speaking the way we usually speak in meetings or whatever this is how I talk when I'm with my research supervisor so if I'm getting insights from these organic sources and that's a lot better than as specifically regarding a demo so it's really good we can have a big appendix in our term paper in which we include a lot of interesting results PDF to audio is it is a problem because your computer is very full but the starting now on was it there's an interesting fire that we recorded and it doesn't even have to be particularly interesting if it's just a long file of so it's it's a cheesy things going on in this conversation and recording and so I'm super interested in seeing what comes out of this recording and let me fetch my okay cool I just faxed you a video transcript of pie so that should be super Cool's and I'm really excited for this 202nd thing to stop so that I can run on it and see what it produces also maybe we should have like an end for this meeting of like midnight that makes sense I had I stayed up very
