

what I was saying it's just that I think that we can highlight each of these guys and I like the idea of you mentioning emphasizing that audio analysis mood is the main mood and bonus feature but it's a good idea to have stocks audio bass Eli okay let's keep talking let's have this be over here that have this guy be over here let's have this guy be over here and make him go a little bit up and actually I can I can have this going to bed down and this goes a bit down post session feedback audio based the alliance still recording my voice good should I add all these things to the final presentation scripts in a new page come up and then we will have the part about what what works well will make sure to cover that during the demo and that's why we need to actually that's why I'm saying that it might be good to record it would be good to the Garden Ashdown because we don't exactly know what's in our demo mentally and we need to carefully plan out everything including the the word of the devil we see is something that is carefully crafted so just because we can have a lot of time problem so after that when we go to after the demo Israel to System supposed what is the System supposed to do impressive demo and how it works omigod we also need how it works this is something actually can you I don't know instead of Bob being on the side instead of this in our presentation we have Bob show up and then we will have these guys show up on the side right so we have this we'll have Bob show up then we'll have these guys show up on the side then Bob can go away and after Bob goes away we can have on the right-hand side how we examine each of these things does that make sense Dakin
