Words commonly used in Speech:

I'm going to actually say what I expect for the I was recording the whole time that you and I were having the command line terminal Revelation I call it terminal Revelation that way so it doesn't get over it in we can check out the transcript that I would expect that sentiment to be happy and surprised if it's not I'm going to be offended I would be concerned is what I mean okay so I don't know why it says because I was happy and surprised mostly so cute yeah by the way I do want me to remove the transcription and only a summary to add the ivy day pronounce lot or do you want to have that if we go to name if we go to kayond everybody cry and then we go to gaze tracking. Master and then we open YouTube actually instead will just open it in the implementation Studio Milestone with sound and without sound so we have the implantation Milestone with sound in front of us and then what we have is okay yeah I do feel bad about what happened okay okay or right I am the one who messed this up so that's quite sad but then what we have is 51% and 51% so what I want to do is that this is fine not looking Center not looking Center is equal to 0 right so what we want is if you if this exceeds its this exceeds 20 so as soon as you look Center I want the buffer to be reset as soon as you look Center I want the buffer to be reset and otherwise I want the buffer to be + equals one so when the buffer to be plus equals one here plus equals one here plus equals one here plus equals one here and if I looking not centered distributes us okay and then what I want is I want if not looking Center buffer if not looking Center buffer greater than 50 then I want to shred play sound. Start so this is what I want I'll remove this from everywhere else and now I will put it here and now I'm going to try the playing with sound so I'm going to open another terminal and going to make it big and I'm going to say Gizmo sound

Key words used in Speech:
