something more specialized then suggested there's a lot of jargon being used straight so we could also potentially or we could do a lot of cool stuff readability School maybe we just had some of the worst that can better considered heavy or not transcription which will be highlighted special word to be highlighted and for Jarvan types of warts or four more technical words that will take demoed to the class in our presentation to the final project and do you want me to ask the and they upset that nobody I think nobody answered my question about the Boston Masters doing papers I had to follow up where yeah they've asked Professor Davis with doing papers can you since I've already followed up and they can see who my name is what my name is can you follow up to this or do we have to respect you to show user studies in the final presentation or something like that
