Filler words used in Speech:

okay so I am going to start now by first looking at the two transcripts that just got generated so I can take a look at how we're doing with the different things on the transcripts if we open it up and I like this I like this a lot there's a lot of things that come up when we talked about corvus and we going to just scroll through it looks like over this is amazing this is actually amazing I love how we have a lot of nice keywords that are selected and it's a little bit sad that we have a lot of sad. Come up but it's also amazing that I have so many for the words generated from what I have to next week and take a look at the other transcript we have so let's take a look at this one if we open it and cream we see a lot of words that we recorded as part of the process for creation of the slide so I like that too and then would I would like to have idea day is some sort of memory of which exact I think it might have been what other things did I record today it must have been so let's do a dime track of where we're at cuz I also have to go at 6 sharp right how are you doing on the pronouns right because the next step after generating the report of the pronouns and testing that and pushing that will be to add the script that I wrote and sent you beyond the patient will report that was a really good discussion and everything but not without current because the report which president was is different from the report right now and it's 952 Friday nights and everything that everything that we have recorded is either in the Google Drive or it is in my computer to add that I want you to have access to these when I am present or when I'm going to office hours because I I want you to be able to see all of these so I will actually add every single way far that I have in the carpus we 14 door-to-door interesting recordings folder so that way you can easily analyze there's no quick way of telling which interesting recording map to watch right except the fact is that I've got we can quickly get the info for file to see how long it is and we can also quickly scan the name of the file to have some insights about what with what when I demonstrate the gay stingray that's when that's the only time when I think I will demonstrate the audio CLI because in the other two we should buy The Voice asking as what do you want to make a presentation about the Wii super cool that's also a friend of ours so I have a question would you rather have the audio clib depicted for gays or would you rather have it be detected for the I think it's best to have a B for the presentation generation just because the gays is not depending on the audio see Ally and it's kind of clunky to transition from the audio CLI to the gate because the what is Eli gives you a prompt and having a prompt play Nirvana presentation will take way too long it's much better to have the audio Silay integrated into the presentation generator UCLA for any mood but are only displaying it for presentation generation mode Eli in the next 20 seconds while you add the script just because there's one part of the presentation that I would not be able to do that you will have to do and that part of the presentation is if you could I order a copy this light if you could just go over the so if you could just go for this light and to the right map it to how we implemented it so like on the right for each of these things just put how we implemented It studio in which we had a system diagram we had this but we need to make a completely new version of this so here we divided the input into speech recognition you remember how we did this thing for like what works well and needs Improvement so we can actually make a similar slide where we have like system like we can have some title and we can put the list of the things that you said in a presentation script the things that you said worked well all of these guys we can have them here and it needs Improvement we can put the things that are the interesting failure and also the I mean the only came up with something that we're not even going

Transcription of your speech:
okay so I am going to start now by first looking at the two transcripts that just got generated so I can take a look at how we're doing with the different things on the transcripts if we open it up and I like this I like this a lot there's a lot of things that come up when we talked about corvus and we going to just scroll through it looks like over this is amazing this is actually amazing I love how we have a lot of nice keywords that are selected and it's a little bit sad that we have a lot of sad. Come up but it's also amazing that I have so many for the words generated from what I have to next week and take a look at the other transcript we have so let's take a look at this one if we open it and cream we see a lot of words that we recorded as part of the process for creation of the slide so I like that too and then would I would like to have idea day is some sort of memory of which exact I think it might have been what other things did I record today it must have been so let's do a dime track of where we're at cuz I also have to go at 6 sharp right how are you doing on the pronouns right because the next step after generating the report of the pronouns and testing that and pushing that will be to add the script that I wrote and sent you beyond the patient will report that was a really good discussion and everything but not without current because the report which president was is different from the report right now and it's 952 Friday nights and everything that everything that we have recorded is either in the Google Drive or it is in my computer to add that I want you to have access to these when I am present or when I'm going to office hours because I I want you to be able to see all of these so I will actually add every single way far that I have in the carpus we 14 door-to-door interesting recordings folder so that way you can easily analyze there's no quick way of telling which interesting recording map to watch right except the fact is that I've got we can quickly get the info for file to see how long it is and we can also quickly scan the name of the file to have some insights about what with what when I demonstrate the gay stingray that's when that's the only time when I think I will demonstrate the audio CLI because in the other two we should buy The Voice asking as what do you want to make a presentation about the Wii super cool that's also a friend of ours so I have a question would you rather have the audio clib depicted for gays or would you rather have it be detected for the I think it's best to have a B for the presentation generation just because the gays is not depending on the audio see Ally and it's kind of clunky to transition from the audio CLI to the gate because the what is Eli gives you a prompt and having a prompt play Nirvana presentation will take way too long it's much better to have the audio Silay integrated into the presentation generator UCLA for any mood but are only displaying it for presentation generation mode Eli in the next 20 seconds while you add the script just because there's one part of the presentation that I would not be able to do that you will have to do and that part of the presentation is if you could I order a copy this light if you could just go over the so if you could just go for this light and to the right map it to how we implemented it so like on the right for each of these things just put how we implemented It studio in which we had a system diagram we had this but we need to make a completely new version of this so here we divided the input into speech recognition you remember how we did this thing for like what works well and needs Improvement so we can actually make a similar slide where we have like system like we can have some title and we can put the list of the things that you said in a presentation script the things that you said worked well all of these guys we can have them here and it needs Improvement we can put the things that are the interesting failure and also the I mean the only came up with something that we're not even going

Summary of the speech:
Come up but it's also amazing that I have so many for the words generated from what I have to next week and take a look at the other transcript we have so let's take a look at this one if we open it and cream we see a lot of words that we recorded as part of the process for creation of the slide so I like that too and then would I would like to have idea day is some sort of memory of which exact I think it might have been what other things did I record today it must have been so let's do a dime track of where we're at cuz I also have to go at 6 sharp right how are you doing on the pronouns right because the next step after generating the report of the pronouns and testing that and pushing that will be to add the script that I wrote and sent you beyond the patient will report that was a really good discussion and everything but not without current because the report which president was is different from the report right now and it's 952 Friday nights and everything that everything that we have recorded is either in the Google Drive or it is in my computer to add that I want you to have access to these when I am present or when I'm going to office hours because I I want you to be able to see all of these so I will actually add every single way far that I have in the carpus we 14 door-to-door interesting recordings folder so that way you can easily analyze there's no quick way of telling which interesting recording map to watch right except the fact is that I've got we can quickly get the info for file to see how long it is and we can also quickly scan the name of the file to have some insights about what with what when I demonstrate the gay stingray that's when that's the only time when I think I will demonstrate the audio CLI because in the other two we should buy The Voice asking as what do you want to make a presentation about the Wii super cool that's also a friend of ours so I have a question would you rather have the audio clib depicted for gays or would you rather have it be detected for the I think it's best to have a B for the presentation generation just because the gays is not depending on the audio see Ally and it's kind of clunky to transition from the audio CLI to the gate because the what is Eli gives you a prompt and having a prompt play Nirvana presentation will take way too long it's much better to have the audio Silay integrated into the presentation generator UCLA for any mood but are only displaying it for presentation generation mode Eli in the next 20 seconds while you add the script just because there's one part of the presentation that I would not be able to do that you will have to do and that part of the presentation is if you could I order a copy this light if you could just go over the so if you could just go for this light and to the right map it to how we implemented it so like on the right for each of these things just put how we implemented It studio in which we had a system diagram we had this but we need to make a completely new version of this so here we divided the input into speech recognition you remember how we did this thing for like what works well and needs Improvement so we can actually make a similar slide where we have like system like we can have some title and we can put the list of the things that you said in a presentation script the things that you said worked well all of these guys we can have them here and it needs Improvement we can put the things that are the interesting failure and also the I mean the only came up with something that we're not even going
